Board Of Trade Meeting Held

**D. H. Elton Leth-
bridge Mayor**

The Financial statement for the past year was read and accepted and the President also made a few remarks of the Board's activities during the past year. The balance sheet showed \$211 in the current fund of the Board of Trade, and \$1,357 in the Stampede Committee Trust account.

A committee was appointed consisting of C. D. Compton, T. Geo. Wood and J. D. Hall to investigate the cost per plate of a combined dinner and dance, to be held either in the Opera House or Second Ward Chapel and to report back at the February meeting.

The meeting adjourned at 9:30 p.m. A slim attendance at the Board of Trade meeting Monday night resulted in a motion being passed postponing the election of officers until the February meeting when a Nominating Committee will submit a slate of suggested officials.

Alberta News Bulletin

Issued by the Publicity Com-
missioner, Government of
Alberta, Edmonton,
January 5, 1935.

Registration of Firearms

Registration with police authorities of all pistols and revolvers is now required, according to an amendment made to the criminal code of Canada. Resident of Alberta are required to make registration with the nearest mounted police detachment, or with the Chief of Police in the cities of Calgary, Edmonton, Lethbridge, Medicine Hat, Drumheller, Red Deer and Wetaskiwin.

Value of Field Crops

Value of field crops in Alberta for the past season has been estimated at \$104,594,000 by the Dominion Bureau of Statistics at Ottawa. The wheat crop estimated at 112,000,000 bushels, is valued at \$59,627,000, compared with \$38,745,000 for 1933.

Beet Sugar Output

Production of sugar beets in Southern Alberta during the past season has been estimated at 173,000 tons, a considerable increase over last year. The output of sugar from the factory at Raymond is expected to exceed 50 million pounds for the first time since the factory was opened.

Total Marriages Increased

In 1934, up until November 30, there were 5406 marriages performed in Alberta as against 5093 for the same period of last year, or an increase of 313. For the first eleven months of the year in Edmonton there were 1196 marriages as against 1037 last year. Calgary reports 970 as against 917 last year. For the rest of the province there are 3240 for the first eleven months, with 3139 in the same period last year.

A Splendid Record

At the beginning of 1933 according to the report of the Municipal Affairs Department, printed recently the seven city municipalities of Alberta had out their debenture debt by \$7,275,530.33. 55 towns had reduced their debt by \$149,205.06; 145 villages by \$10,845.35 and 5 municipal districts by \$1,351.05. Only 5 districts out of 102 have outstanding debenture.

Winter Highway Program

Winter road clearance program of the provincial department of public works for the present winter will cover practi-

David Horton Elton, LL.B., K. C., was elected Mayor of the city of Lethbridge at the Statutory meeting of the Lethbridge Council held last week, by a vote of 4-3. One report stated the election would be disputed. The new incumbent has been a resident of Lethbridge since early in the century, moving there from Cardston. During his stay in Cardston he edited the Alberta Star and also papers in Magrath and Raymond, and is therefore known to old timers throughout the entire south of the Province. He has always been an ardent worker in the L.D.S. Church, and is a favorite and much sought after speaker. At present he is an outstanding figure in the Kiwanis Club and is district governor of the organization.

He will have the best wishes of his many friends in his new job as Mayor, and we are sure his administration will be successful.

SILOED BEETS NEARLY ALL IN NOW

According to Superintendent F. R. Taylor, the end of this week will see all the siloed beets in the district delivered to the sheds at the factory. Generally speaking the beets have kept well in the silos, and practically all the damage has been in the piles that have been left open while hauling from them. The gross tonnage will be local plant in any one season. Near the 170,000 ton estimate given out when digging was well under way.

The sugar content is fair, but will not average up as high as last year's did. However, the increased tonnage will help to set this loss in sugar content.

The campaign will be finished according to present estimates sometime during the first or second week in February.

BASKETBALL LEAGUE OPENS SATURDAY

The Senior and Intermediate Basketball leagues will open with a double header in the Opera House Saturday night when the Raymond Idlers meet the Magrath Intermediates, and the Union Jacks play host to the Lethbridge Aces.

All these teams have been working for some weeks, and are in good shape so that Saturday's games should be fast, close and interesting. Tickets are on sale at Heggie's Barber Shop, and 50c. will take you to both games. Get them now while the picking is good.

Thos Wolsey was in the Jefferson district south and east of Cardston on Tuesday.

The weather this week has been delightful, with the days clear, still and not very frosty. A light fall of snow arrived early Tuesday morning.

Practically the same mileage of main highways as last season, approximately 1,000 miles. This will be carried out and extended as rapidly and successfully as weather conditions permit.

Coal Production

The total coal production of Alberta mines to the end of November was 4,180,828 tons, compared with 4,087,518 tons for the same period of 1933.

Senior Hoop Schedule Is Now Drafted

LETHBRIDGE ACES WILL VISIT RAYMOND IN OPENER ON SAT., JAN. 12—TWO SOUTHERN TEAMS MEET FOUR TIMES WITH ONE POINT IN STANDING REWARDING THEM FOR VICTORY—SCHEDULE ENDS IN MARCH

With two teams from Calgary and one each from Edmonton, Raymond and Lethbridge, the Alberta Senior Men's Basketball League crashes the sports spotlight with the opening game being played Saturday, January 12, at Raymond. The five teams entered will enter the lists under the names of Raymond Union Jacks, Lethbridge Aces, Calgary Wilcats, Calgary Printers and University of Alberta Golden Bears.

The schedule has been arranged on a somewhat peculiar point basis in order to compensate for the fact that Varsity plays two games less in the schedule than the remaining quintets. All games between Lethbridge and Raymond will count one point in the standings for a win, wins by these two southern teams against any of the other teams will count two points. All games which the two Calgary squads play against each other will count one point for a win, wins against any of the other games will be good for two points.

Opening date sees the Aces allowing for visiting girls' team onousting with Raymond Jacks 16th.

on the Raymond Opera House floor. The schedule drafted shows each team playing ten games—five at home and five away. Varsity, however, only plays eight games.

The schedule as published has not been accepted by the Lethbridge team, who feel that games have been so arranged that they will be unable to meet heavy travelling expenses without more home games at the outset.

THE SCHEDULE

January—
12—Lethbridge at Raymond.
19—Raymond at Lethbridge.
Printers at Wilcats.
22—Varsity at Wilcats.
23—Varsity at Lethbridge.
24—Varsity at Raymond.
26—Varsity at Printers.

February—
2—Lethbridge at Wilcats.
4—Lethbridge at Varsity.
9—Wilcats at Varsity.
Raymond at Printers.
16—Lethbridge at Raymond.
Wilcats at Printers.
22—Wilcats at Lethbridge.
23—Wilcats at Raymond.
Printers at Varsity.

March—
2—Printers at Wilcats.
Raymond at Varsity.
4—Raymond at Wilcats.
9—Lethbridge at Printers.
16—Wilcats at Printers.
Raymond at Lethbridge.
22—Printers at Raymond.
23—Printers at Lethbridge.
May be played March 13 to allow for visiting girls' team on 16th.

Twilla Gourley Passes Away In California

The family and friends of lady with a host of friends who have been expressing their condolences to the bereaved family. She had been with relatives in the States for several months, and had been having a splendid time, and her demise came as a shock to everyone here.

Owing to difficulties in arranging for shipment, funeral services and burial took place in Los Angeles, California.

The sympathy of the entire district is extended to the family in their sad bereavement.

Twilla was a popular young

News .: Notes

Fritz Gehmlich was in Lethbridge on Tuesday and took out his naturalization papers, or at least applied for them.

Godfrey Holmes moved his house onto the foundation this week, and will be busy now getting it straightened around just right. T. T. Mendenhall helped him with the moving.

"Bright Eyes" starring Shirley Temple, and "As the Earth Turns" were two attractions which had the praise and applause of all Capitol patrons in Raymond this week.

A band meeting is called for Monday night, when everyone interested in band work is asked to attend. If we are going to have a band this winter, we must get started. Be at the Town Hall Monday night at 8 p.m.

Town Council Has Busy Session

News Notes

The High School team is playing a league game of basketball in Cardston tonight.

Don't forget the Married Folks Dance in the Opera House next Thursday night. Read the ad. in this paper announcing it.

Heavy colds and sore throats have been the order of things for the past couple of weeks. No serious illness has been heard of.

Red Deer made a record in tax collections for 1934, when they collected 102.45 of the levy for the year.

Roads in the Cardston district are still not very good, and getting stuck is a rather common occurrence for both cars and trucks.

It begins to look like the return of prosperity when one sees places of amusement and games so well patronized day after day.

Raymond had a visit from some fortune telling gypsies this week and a number of local people had their future forecast.

The syrup tanks at the Factory are a busy place these days as load after load of molasses finds its way to the hungry backs of the district.

Be on hand for the Basketball game tomorrow night. We do not need to tell you that it will be good. When Lethbridge and Raymond meet, it is always good.

Over 1,000 people dead in a week is the toll taken by acute malaria in the city of Colombo, Ceylon. Every effort is being made to get the epidemic under control, and streets are a continuation of funeral corteges.

The skating rink has been very popular the past week or so. With the mild weather and good ice, everyone has been indulging in this invigorating exercise.

After a delightful week, snow commenced falling at noon Friday, and when the paper went to press the flakes were still falling rapidly. So far January has been quite pleasant but we may be due for another cold spell.

A holdup of a service station in the outskirts of Calgary at 10:30 Saturday evening last, netted the perpetrators exactly 26 cents and a flashlight, in exchange for which they left a pair of woolen mitts. A window had been broken to gain admission.

Mr. and Mrs. John Smith of Cardston were Raymond visitors the first of the week.

The parents of Mr. W. H. Steed, are celebrating their 67th anniversary of their marriage in Utah this week. It is seldom that a couple have that long a married life.

The new sweat suits of the Raymond Idlers were on display at the Broadway Store on Monday and Tuesday of this week and were the centre of considerable attraction. They are a bright red, trimmed with white, with zipper fasteners on them. The boys will be racing around in them for Saturday's game, and with the new playing suits also, should be impetuous enough for them to win without a doubt.

The regular meeting of the Town Council was held in the Town Hall last night, Thursday, with Mayor Meeks in the chair. The first business of the meeting was to pass the bills and the payroll of the past month.

The Cash report for the year was presented, which showed a substantial increase in the collections of both the Town and School taxes. This was a very heartening piece of news to the Council, who for several years past have been wrestling with the problem of small returns and heavy demands on the treasury.

Nomination Day was set for February 4th, and Election Day for February 11th, and George Fairbanks was named Returning Officer. A by-law was also passed setting a fee of \$2.00 per meeting for the members of the Council.

The filler at the Town dam was discussed at some length, and the Town Engineer was instructed to push this improvement to as early a completion as possible. A 4" pipe, with an automatic valve will also be installed, so that a certain and constant flow of water into the mains will be provided without the necessity of someone being on hand all the time to watch this part of it.

Wedding Bells

PACY - BETTS

At the residence of Mr. and Mrs. George E. Lyons the marriage was solemnized on Monday, December 31, 1934 of Miss Lenna Betts of Raymond, to Clarence Caleb Pacy of Orion, with Bishop O. W. Ursenbach officiating.

Mr. and Mrs. Pacy will live at Orion, and Lenna's many friends wish her much joy and happiness in her new home.

SMALL TOWN PULSES WITH ANN HARDING IN "VIRGIE WINTERS"

With statistics indicating that the great proportion of America's population either lives, or has lived, in small towns and rural communities, RKO Radio's Ann Harding starring film "The Life of Vergie Winters," is declared to have tremendously wide audience appeal.

The entire story unfolds against a typical small town background, with the players all portraying familiar characters. Every person who lives, or has lived, in minor community will recognize the individual of the play. So true to the realities of human nature are the characters that they will be convincing even to those who have never lived in a small community, it is claimed.

Miss Harding portrays Vergie Winters the milliner of the town, and it is around her unconventional romance with John Boles, seen as the community's "favorite son" and political leader, that the powerful drama centers. The story covers the span from 1910 to 1932 and is said to offer one of the greatest emotional themes ever brought to the screen.

Supporting the two leading players is a cast of hundreds headed by such favorites as Helen Vinson, Betty Furness, Molly O' Day, Wesley Barry, Ben Alexander, Frank Albertson, Crieghton Chase, Donald Crisp, Dorothy Sebastian, Josephine Whittell and many other well known players.

Alfred Santell directed "The Life of Vergie Winters" which Jane Murfin adapted from the distinguished short story by Louis Bromfield.

IS IT FAIR MR.

BUSINESSMAN?

When the Board of Trade meeting was called to order Monday night last there were present, two more coming in later, making an attendance of 11 at the Annual meeting of the Board when the reports for the past year, and the election of officers for 1935 should have taken place.

Now Business men of Raymond, we ask you is this thing as it should be. In past years the Board of Trade has expended a great deal of money and energy in getting new industries into our midst and urging much needed improvements in the town and district. That their efforts have been crowned with success is evidenced by the steady and continued growth of our city. As a result of these efforts, today we are one of the best, if not the best town of our size in all Alberta. The efforts of the past executives of the Board of Trade in this steady growth should not be overlooked.

The fact that the Board has not been on the firing line for a year or so may have caused some slackness in attendance, but even that is no excuse for a business fraternity the size of ours letting a civic organization

such as the Board of Trade down as badly as we have been guilty of doing during the past year. Think is over, Mr. Businessman. If for no other reason than the fact that the Board of Trade sponsors our Annual Stampede which brings considerable revenue to the town each summer, it should be supported and kept alive. The fact that we now and will always need improvements in our town, and that a body that can always speak for the town and community is of untold value is another good reason for keeping the Board of Trade going.

The Annual election has been postponed one month, so no matter how busy you are, try and reserve a couple of hours on the first Monday of February the 4th, to be exact, to come to the Board of Trade meeting and help revive it, and then KEEP IT GOING.

LAUNCH CAMPAIGN TO AID DOMINION SCOUT MOVEMENT

GOVERNOR-GENERAL WILL SPEAK ON RADIO FRIDAY NIGHT URGING SUPPORT

Launching a campaign to raise funds for the extension of the Boy Scout movement in Canada, His Excellency the Governor-General will address a vast audience Friday evening at 6:55 o'clock, when he speaks on "Scouting" over the coast-to-coast network of the Canadian Radio Commission.

Speaking in his capacity of Chief Scout, the Earl of Bessborough will give a brief outline of what the Scout movement means to Canadians, both young and old, and will ask for wide and generous support on the

part of citizens in all sections of Canada.

Various projects will be undertaken during the campaign which will get underway some time early in February, to raise sufficient money to finance Canadian scouts and their activities for the next five years. During that period no other appeal will be made for funds, except small local appeals from time to time for some specific undertaking.

At the present time, Canada has an active scout force of 60,000 vigorous, self-reliant young men and boys. Of that number the names of 6,200 are inscribed on the Alberta rolls. Under guidance of Provincial Commissioner J. H. Woods and a large group of trained leaders, the movement is forging ahead here, as in other provinces, states and countries of the world.

Drawing attention to the fact that Alberta has the highest enrolment per capita of any province in the Dominion, Col. Woods said: "We have here a force that is being trained in citizenship through ideals and precepts—a body whose usefulness and opportunities it is for you to see. It is open to the efforts of young men and women, and no work more worthy of the support of older men and older women than this, the work of the Boy Scouts."

Statements in all parts of the world have lent their support to the scout movement. During one of his public speeches, Lord Willingdon, a former Governor-General of Canada, characterized it as a "younger, League of Nations," and the most hopeful organization to banish the terror of future warfare.

Alberta will be asked to do her share next month in raising funds to finance the new scout "five year plan." Those interested in the movement are convinced that generous assistance will be forthcoming.

Alberta Winkler is driving a Chevrolet six Coupe, which he traded for recently.

LIFE BEGINS

Thanks to an interesting book and a popular musical play, the phrase "life begins" has taken

on a new meaning. A previous generation used to refer to those who were dead but did not know they were.

Despite the change in meaning of phrases and expressions the human body in its development continues to follow along well-established lines. No matter at what age you may consider life begins, the development of your teeth began at least six months before the day of your birth.

After all the important question is "What happens?" rather than "When did something begin?" It is of no particular value for us to know that although most babies are born without any visible signs of teeth, yet the teeth are well under way even if they are hidden. This information, however, is of no particular value unless we make use of it.

Actually, from the point of view of dental health, this is the most important idea for us to get hold of. The soundness of our teeth depends upon the when the structure of the food we eat during that period teeth is being laid down. The diet of the expectant mother determines the kind of teeth baby will have for his first what he continues to eat during the early years of life is the deciding factor as to the kind of teeth he will have and how long they will last.

Nothing is of more interest to the family than baby's first tooth. Few things should be of as much interest as the loss of the first permanent tooth. It is unfortunate that lack of reasonable care in eating the right kinds of food, neglect of cleaning and delay in securing dental care lead to so much dental disease, but this is so.

It is not suggested that any one should have to eat with his mind fixed on his teeth alone. The teeth are a part of the body and so they are affected, for good or ill, by those things which make or mar the health of the body. Food that is good for the whole body is good for the teeth. Milk, fruits, green leafy vegetables, egg-yolk and cod-liver oil are the foods which the growing child needs in abundance.

The teeth should be kept clean. The most important time to brush the teeth is before going to bed, and it is desirable also to brush them after each meal. Once decay has started, there is only one way to arrest it and that is through proper dental treatment. Better still, do not wait until you know there is decay: have your teeth examined regularly.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

PATHFINDING

Established in 1817, the Bank of Montreal was the first permanent bank in British North America.

Inaugurating branch banking in Canada, it was the first bank in the capital of Lower Canada, first in the capital of Upper Canada, and first of the present banks in Bytown, afterwards Ottawa, the capital of the Dominion. It was the first permanent bank to be established west of the Great Lakes and the first to achieve a transcontinental system of branches. It was also

The first institution to provide Canada with a domestic currency, both bills and coinage.

The first bank to assist in financing the foreign trade of Canada.

The first banker for the Government of Canada.

The first bank to help finance the improvement of the St. Lawrence Waterway, through the assistance it gave to the building of the first Lachine Canal.

From its inception the Bank of Montreal has held the confidence of the Canadian people. Today that confidence is expressed in the fact that the Bank holds more than one million deposit accounts, equal to a deposit account for one in every ten persons in the entire Dominion.

Canadians naturally expect, as the sequel to such a record, that this Bank will retain the spirit of the pioneer in co-operating with the future business life of the nation.

EXPERIMENTAL STATION, LETHBRIDGE

WEEKLY LETTER

Numerous enquiries have been received at this station regarding the use of the new improved Ceresan for controlling smut and though seeding time is still some months away, readers of this weekly letter will be greatly interested in the results obtained with this new dust treatment in tests recently conducted by the Division of Botany of the Central Experimental Farms Branch. Following is a summary of information supplied by Dr. W. F. Hanna of the Laboratory at Winnipeg.

New Improved Ceresan, or Ceresan as it is commonly called, is applied to the seed in dust form and its active agent is Ethyl Mercury Phosphate of which it contains 5 per cent. In the tests conducted it has given excellent control of bunt of wheat, covered smut of barley and smuts of oats. The dust is applied to wheat, oats and barley at the rate of one-half oz. per bushel. More than 1/2 an ounce of dust per bushel should not be used.

Seed treated with New Improved Ceresan gives a somewhat higher percentage of germination than untreated seed. In order to insure the best smut control grain treated with Ceresan should be allowed to stand at least 24 hours before being sown. Dr. Hanna states, however, that experiments conducted at Winnipeg laboratories have shown that the time between treating and seeding should not be too great or the germination of the seed may be adversely affected. This is most likely to happen when the moisture content of the seed is high. In practice therefore, it is suggested that seed be treated not more than about one week before it is to be sown.

New Improved Ceresan is about the only dust on the market in Canada which can be used for treating oats and barley as well as wheat. Moreover, since it is applied at the rate of only 1/2 ounce per bushel, it should not give rise to clogging of drills, a fault that has been attributed in the past to copper carbonate. As compared with Formalin, New Ceresan slightly improves seed germinability, whereas Formalin sometimes impairs germination. It is also usually considered that dust treatments can be more easily and conveniently applied than liquid treatments. The cost of the Ceresan, purchased in five pound lots, works out at about 2 1/2 cents per bushel.

Since Ceresan contains mercury, grain treated with it should not be fed to livestock and when treating grain with this dust it is advisable to wear some kind of mask or cloth over the face.

Dr. Hanna reports that experiments have been conducted with a number of commercial

HENRY FORD TALKS TO HIS DEALERS BY TELEPHONE

(1) Henry Ford, world-famous Automobile Pioneer, is here seen at the microphone in his Dearborn office.
(2) W. R. Campbell, Canadian President, addresses the dealers of the Continent through the new Studio Microphone on his desk in Windsor, Ont.

HENRY FORD, always a pioneer, has inaugurated the modern method of holding dealer meetings — by telephone. Last year was the first time this was tried. It was so successful that on December 27th last, he, his son Edsel, President of the Ford Motor Company, Wallace R. Campbell, President of the Ford Motor Company of Canada, and other officers, were linked by the voice highways of the Continent to ten thousand Ford dealers gathered in forty-one cities to hear about the new car. — The largest dealer meeting in the world's history.

For this great hook-up, using 15,000 miles of wire circuits, and requiring more than 250 telephone employees to complete and maintain the 60-minute connection, the latest model studio microphones, as used in all leading broadcasting stations, were employed. Also, by special arrangement with the Northern Electric Company, in co-operation with the trans-Canada Telephone System, the voices were picked up from the telephone lines in the leading cities of Canada, and were put through amplifiers and loudspeakers in order to accommodate the large gathering of dealers in the larger centres of the Dominion.

The Broadway Store

News Notes

The amount of branded beef sold in Canada during the month of November, 1934, was 3,705,123 pounds an increase of over 924,000 pounds on the sales in November 1933.

Canadian branded beef is exactly what the name implies—the beef has been graded for quality under the authority of the Dominion Department of Agriculture and is plainly stamped in the form of ribbon-like marks running lengthwise.

According to the Canadian Customs returns 18,769,770 bushels of wheat valued at \$14,744,938 were exported from Canada during the month of November, 1934.

Standardized grading appears now to have become definitely established as a permanent factor practically all phases of the poultry trade in Canada.

The colour of honey which varies from water-white to a very dark brown does not affect its food value in any way. The difference in colour is caused by the absorption of rays of light in varying degrees by certain substances in the nectar of the different flowers.

In the opinion of a leading importer of wool in Great Britain, Canadian angora wool of the best quality can be ranked next to the French angora which receives a preference over other shibments owing to its texture. Canadian producers send a moderate quantity every year to the British market.

The Dominion Experimental Farms in response to enquiries have conducted a series of experiments for the purpose of ascertaining the feeding value of fish products for live stock and poultry. The results of these experiments are continued in a bulletin on fish meals and oils published by the Dominion Department of Agriculture.

Graded Poultry and Eggs

In both eggs and market poultry the year 1934 was on the whole, more profitable to producers than was the year 1933, says the "Agricultural Situation and Outlook" for 1935 about to be issued by the Dominion Department of Agriculture, in co-operation with the Department of Trade and Commerce. There is every prospect that in 1935 the farm poultry flock will again be a steady & reliable source of farm income, but prospects, both on the domestic and export markets, point more to the need of an improvement in quality than to the desirability of an increase in volume. The brightest spot in the Canadian poultry industry at the moment is the opportunity for increasing the export trade in market poultry. Official reports from England indicate that this opportunity in poultry products stands second only to that of bacon.

The average farm producer depends to a large extent, on profitable spring egg prices to derive a satisfactory revenue from his poultry flock. During the spring of 1934 prices were two to three cents above those of 1933. There is no evidence that these prices were higher than the domestic demand warranted but there is no doubt that the higher prices paid had a bearing on the lower quantity exported, especially with the British market for fall shipment ranging from 3 to 6 pence per long hundred less than a year ago.

As is not uncommon, egg prices during the summer months were rather depressed and the most urgent need of the egg producer is to find some way to maintain buoyant prices during the summer months. Undoubtedly one important reason for unsatisfactory summer prices is the generally mediocre quality of eggs marketed at that season. Producers can do much to help normal conditions during the summer by improving summer production methods, more frequent collection

and in the interval before shipment making sure the eggs are kept in the coolest, driest place in the farm home.

Egg prices in the autumn of 1934 were reasonably satisfactory and showed a useful margin of profit to producers who had eggs to market at that time. Last winter Canadian egg prices ranged as much as twenty cents a dozen above United States markets of similar standing.

A useful development in the domestic market, more particularly in central and eastern Canada, has been in connection with Grade A-1 eggs. A considerable number of the better commercial producers have taken advantage of this grade and have been able to improve their prices materially, numbers of producers claiming to have obtained five or six cents a case had they sold them as would otherwise have been the Grade A. The movement in this line, as started in Ontario gives promise of extending to Quebec and other provinces.

Resisting Temptation
Physician — You'll have to send for another doctor.

Sufferer — Am I so ill as that?

Physician — I don't know how ill you are, but I know you're the lawyer who cross-examined me when I appeared as an expert witness. My conscience won't let me kill you, and I'll be gosh-darned if I want to cure you.

COUNTERFEIT GANG BUSY

There has been a counterfeit gang at work in Western Canada the past couple of weeks who have counterfeited Travellers Cheques, and cashed them in wholesale fashion from Winnipeg west Saturday last they appeared in Calgary and police there believe their swindle will net them \$2,000 or more. The counterfeit was not discovered until the cheques reached the Clearing House Monday. In some cases the stores were short of cash and issued cheques of their own for the difference. Payment on these cheques was ordered stopped.

The gang chose Saturday afternoon and evening after banking hours for their work, which gave them longer to make their getaway.

DRY CLEANING

A little boy had taken his mother's powder puff and was in the act of powdering his face when his small sister, aged five snatched it from him.

"You mustn't do that," she exclaimed, "only ladies use powder. Gentlemen wash their faces."

A Scotchman was stripping wall-paper from the walls of his house when a friend called to see him.

"Weel, Sandy," said the visitor, "are ye goin' to have a new paper?"

"Na na," replied Sandy, "Ah'm just moving into another house."

THE PROPER CARE OF YOUR AUTOMOBILE

WHILE they are made of a different material and are not coated with a varnish, as are the tops of closed cars, a certain amount of inspection and care is necessary to the upkeep of the sport model top. This style of top is made from a gray, tan or khaki coloured fabric called teal or Burbank cloth. It usually consists of two layers of closely woven cloth which are fastened together with rubber cement. When this material is new it will resist weather. After the car has been in service for a year or two, however, the top material sometimes loses its waterproof qualities and leaks develop. When this occurs it is useless to try to waterproof the material with a coating of varnish, lacquer or any other kind of surface finish. They are not suited to material of this type, and are liable to cause it to stiffen, pucker, or become discolored. The proper compound to use on sports model tops to renew their waterproof qualities is one which will sink into the cloth and waterproof the fibres without changing the color or appearance of the material in any way.
